

Anatomy and Physiology I | Lecture and Lab

2020-2021

Course Information

Course Numbers Total Credits Time Requirement

BIO221/BIO221L 4 (3 Lecture + 1 Lab) 75 hrs (Lecture 45hrs + Lab 30hrs)

Course Details

Recommended Prerequisites

High School Diploma or equivalent; General Education courses are highly recommended

Course Description

This course is the first in a two parts series covering gross and microscopic structure of human body and basic understanding of physiological mechanisms. The course provides thorough analyses of organization of human body including chemical, cellular and tissue levels of organization; covering support and movement of the body including the integumentary system, bones and skeletal tissue, the human skeleton, joints, muscle tissue and the muscular system; regulation and integration of the body including the endocrine system; and the systems required for body maintenance including digestive system and the principles of nutrition, metabolism, and energy balance. Laboratory includes work with microscope, human body models, and cadavers.

Lecture and Laboratory Communication

A website will be set up on Canvas by your instructor.

Log in with your SCU username and password: https://scuhs.instructure.com

Faculty Information

Refer to the Canvas course webpage for this information.

Class Meeting Times

Refer to Canvas course webpage for this information.

Instructional Materials

Required Text(s)

Anatomy and Physiology by Marieb & Hoehn, 6th edition (ISBN 13: 9780134156415) -OR- Anatomy and Physiology: An Integrative Approach by McKinley 3rd edition (ISBN 13: 978-1259398629)

Lab

Laboratory Manual for Anatomy & Physiology (available on Canvas)

Lab Materials Provided: Safety Goggles; Latex gloves and disposable lab coats

Required Attire

Close-toed shoes, professional attire and lab coats are mandatory during all lab hours. Gloves, goggles and additional safety equipment will be required per experiment.

Course Purpose

Student Learning Outcomes

At the conclusion of this course, a successful student should be able to:

- 1. Understand the necessary life functions and survival needs of humans.
- 2. Label the human body utilizing anatomic terminology.
- 3. Understand the biology of the cell.
- 4. Differentiate the basic types of human tissues.
- 5. Understand the components of the integumentary system.
- 6. Identify the structure and function of bones, skeletal tissue and the human skeleton.
- 7. Understand the structure and function of joints, muscle tissue and the muscular system.
- 8. Understand the normal structure and function of endocrine and digestive systems.
- 9. Synthesize ideas to make a connection between knowledge of anatomy and physiology and real-world situations, including healthy lifestyle decisions and homeostatic imbalances.

Course Schedule

(subject to slight modifications by the instructor)

Reading Chapters refer to the Marieb and Hoehn textbook.

Lecture	Reading	Assessment
The Human Body: An Orientation	Chapter 1	Class Participation
Cells (Plasma Membrane) Cells (Cytoplasm and Nucleus)	Chapter 3	Class participation
Tissues Integumentary System (Skin and its Appendages)	Chapter 4 Chapter 5	Quiz 1
Bones and Skeletal Tissues The Skeleton	Chapter 6 Chapter 7	Class participation
Joints (Articulations) Muscle and Muscle Tissue	Chapter 8 Chapter 9	Midterm Test
The Muscular System The Endocrine System	Chapter 10 Chapter 15	Class participation
Digestive System (Anatomy)	Chapter 22	Quiz 2
Digestive System (Physiology)	Chapter 22	Class participation
	The Human Body: An Orientation Cells (Plasma Membrane) Cells (Cytoplasm and Nucleus) Tissues Integumentary System (Skin and its Appendages) Bones and Skeletal Tissues The Skeleton Joints (Articulations) Muscle and Muscle Tissue The Muscular System The Endocrine System Digestive System (Anatomy)	The Human Body: An Orientation Chapter 1 Cells (Plasma Membrane) Chapter 3 Cells (Cytoplasm and Nucleus) Tissues Chapter 4 Integumentary System (Skin and its Appendages) Chapter 5 Bones and Skeletal Tissues Chapter 6 The Skeleton Chapter 7 Joints (Articulations) Chapter 8 Muscle and Muscle Tissue Chapter 9 The Muscular System Chapter 10 The Endocrine System Chapter 15 Digestive System (Anatomy) Chapter 22

Day	Lecture	Reading	Assessment
9	Nutrition, Metabolism, and Energy Balance	Chapter 23	Class participation
10	Review and Final Test		Final Test

Tentative Grading Procedures

Lecture

Assessment	Points
Class participation/activities	10
Quiz 1	20
Midterm Test	25
Quiz 2	20
Final Test	25
Total	100

Lab Schedule

(subject to slight modifications by the instructor)

Day	Laboratory	Assessment
1	Orientation	Lab assignments
	The Human Body: An Orientation	
2	Cells (Plasma Membrane)	Lab assignments
	Cells (Cytoplasm and Nucleus)	
3	Tissues	Lab assignments
4	Bones and Skeletal Tissues	Lab assignments
	The Skeleton	
5	Muscles and Muscle Tissue	Midterm Test
		Lab assignments
6	The Muscular System	Lab assignments
7	Digestive System (Anatomy)	Lab assignments
8	Digestive System (Physiology)	Lab assignments
9	Nutrition, Metabolism and Energy Balance	Lab assignments
-		

Day	Laboratory	Assessment
10	Review and Final Tests	Final Lab Test & Cadaver Test

Tentative Grading Procedures

Assessment	Weight (%)
Lab Quizzes	30
Lab Tests	50
Cadaver Lab Test	10
Lab Assignments	10
Total	100%

Grading scale:

Please note letter grades will be assigned only at the end of the trimester.

A = 90% to 100%

B = 80% - less than 90%

C = 70% - less than 80%

D = 60% - less than 70%

F = less than 60%

W = Withdrawal

Grading procedures:

The format of assessments may include multiple choice, short answer, labelling, fill-in-the-blank, or matching examinations. Participation points are required and will be assigned by the instructor as the course progresses using any of the following: in class mini quizzes, activities, online quizzes. For online quizzes students must have a phone, tablet, laptop or other internet connected device to participate. Students must be in class during the participation activities to receive participation marks.

Academic Integrity

Visit SCU's Academic Integrity page to review policies for professionalism and academic integrity.

Teaching Methods and Activities

The course requires a significant time commitment from students. This commitment is both in terms of reading before lectures, as well as reviewing the material and doing problems after the lectures. In the five weeks of classes, we will cover the fifteen chapters of the book. Not every topic will be covered in great depth, but students are expected to study each topic in greater detail through completing the homework and the labs.

Required Attire

Close-toed shoes, professional attire and lab coats are mandatory during all lab hours. No shorts, heels, or flip-flops will be allowed in the laboratory; hair longer than shoulder-length must be pulled back and held with a clip or hair tie. Gloves, goggles and additional safety equipment will be required per experiment.

Classroom Expectations

Please be professional, prompt, prepared, and polite always.

The professor will adhere to all policies as found in the Student Handbook. Cellular phones must be kept on silent during class and lab times. Students may not use a phone as a calculator. As a safety precaution, no food or drinks are allowed inside the lab, but there will be a designated break for eating and drinking outside of the lab.

Best Practices for Studying Anatomy and Physiology

- Read before and read after each class. Skim the chapter before it is covered in lecture in order to become
 comfortable with some of the terms associated with each topic. Review each chapter after it is covered in
 class to enhance your understanding of what was covered in class.
- Participate during class by taking notes during class and looking over them afterwards. Don't skip class, arrive late, or leave early. Ask questions for clarification when you don't understand the material.
- Stay on top of the homework and assignments. Do the assigned problems as close to the time as when the topic is covered in the class to increase the depth of your understanding of specific concepts and will help you learn the material more efficiently and effectively.
- Do not wait until the night before the homework is due to start the assignment. You will get more out of it if you take the time to really learn the concepts and review the material without being rushed.
- Find a group of students to study with. Seek out students dedicated to doing well in the course. This makes studying more fun and helps you learn the material better by teaching what you know and learning from your peers what you don't know. Explaining these concepts to others will help you learn the material even hetter.
- Stay focused by finding an environment where you can study with few distractions.

Classroom Expectations

- Please be professional, prompt, prepared, and polite always.
- All policies found in the Student Handbook and SCU policy guide will be adhered to.
- Cellular phones must be kept on silent during class and lab times.
- Students may not use a phone as a calculator.
- As a safety precaution, no food or drinks are allowed inside the lab, but there will be a designated break for eating and drinking outside of the lab.
- Be prepared to spend about 20 hours a week outside of school studying and completing homework assignments.
- It is important to read about each lecture's chapter before coming to class
- It would be a good idea to form study groups.

University Policies

Accommodations

As a learning-centered community, Southern California University of Health Sciences recognizes that all students should be afforded the opportunity to achieve their academic and individual potential. The University recognizes and supports the standards set forth in Section 504 of the Rehabilitation Act and

the American with Disabilities Act (ADA). In accordance with its mission and federal and applicable state laws, the University is committed to making reasonable accommodations for qualified applicants for admission and enrolled students with disabilities. A student who needs accommodation(s) due to a disability should contact the Academic Support Office located in the Learning Resource Center.

Faculty and Dr./Patient Relationships

SCU faculty are highly skilled. However, per University Policy, health care is offered to students through the University Health System only. Neither preclinical nor clinical faculty can provide advice, assessment, treatment, or other elements that would be considered part of a Doctor-Patient relationship outside of a clinical setting established for that purpose.

Learning Activities

Students are expected to spend at least two hours for each lecture hour of course time per week in activities and assessments outside the classroom. Examples of activities include but are not limited to writing papers; reading articles or text; small group work; presentations; completing assignments; preparation for assessments; online activities and other activities that do not include direct instructor interaction and involvement.

All university policies apply to this course and all others. For full policy information please consult the university SCU Policy Manual. For a quick reference guide to the following policies: make-up examination, F-challenge examination, grade posting, results of failing grades, student support information, syllabus amendments, special needs, student conduct, and attendance, please consult the academic policies document housed on the Online Student Services.
