COURSE INFORMATION

Course Number (Prefix Code): BIO116

Course Name: General Biology II Lecture

Course Description: This course is the second of a two-part series covering a general study of life processes, emphasizing basic concepts of biology suitable for health science majors and as a general education elective for non-science majors. Concepts covered include comparative anatomy and physiology of animal organ systems, natural selection, evolution and speciation, and the diversity of life.

Course Delivery Model(s): Online Interactive, Online

Time Requirement:

Lecture Hours per term:	45
Laboratory Hours per term:	0
Total Hours per term:	45
Course Duration (weeks):	5
Credits:	3

Credit Hour Verification: This list represents the average amount of time a student is expected to spend to successfully complete this course.

	Activity Type	Online Hrs/wk
Course Time	Lecture time	0
Academic Engagement	Video Lectures	0.5
	Supplemental Videos	2
	Adaptive Reading Assignment	6
	Homework quiz	4
	Exam	1
	Study time (assessment prep)	7
	Reading (chapter readings, materials research)	6.5
Total	For the course per week	27
	For the term	135

Prerequisites & Co-requisites: none

Recommended Prerequisites or Co-requisites: BIO 111 and BIO 111L; BIO116L

This course may be taken again for credit the following number of times (repeatable): 5

LEARNING OUTCOMES, OBJECTIVES, & ALIGNMENT**Student/Course Learning Outcomes (SLOs)**

In successfully completing this course, students will be able to:

SLOs
1. Describe the inter-relationship of evolution and biological diversity.
2. Describe the characteristics of kingdom bacteria, plantae, and animalia.
3. Describe three benefits of biodiversity in ecosystems
4. Identify the function of the major body systems.

TEXTBOOKS & MATERIALS**Required Textbook(s):**

Biology: The Essentials, Hoefnagel. ISBN: 978-1-265-99265-1

Learning Management System: Canvas. If a student is unfamiliar with the Canvas learning management system, please visit the manuals and learning guides available in the Canvas Student Guide. It is important that students are comfortable and competent in using this system, as all course material and communication will be done via Canvas.

Navigating Canvas – the Canvas site has a large set of [Canvas tutorials and videos for students](#).

Additional Required Materials:

Students may be required to access course-specific digital resources, software platforms, or learning tools as identified in the course schedule or Canvas course site.

Calculator Requirements (When Applicable):

Certain courses, including Mathematics, Chemistry, and Physics, require the use of a calculator.

- **Chemistry and Physics courses:** Only scientific calculators are permitted during quizzes and examinations.
- **Mathematics courses:** Scientific or graphing calculators may be permitted depending on course-specific requirements. Students must verify approved calculator types with the instructor prior to use.
- Graphing calculators are not permitted in Chemistry or Physics examinations and may be restricted in some Mathematics courses.

Provided Materials: Ebook access which includes all homework and assessments, available through the Canvas learning platform/course page.

TECHNOLOGY & EQUIPMENT REQUIREMENTS

[Click here to view the SCU technology requirements](#)

External resources: McGraw-Hill

[Browser and Computer Requirements for Canvas:](#) This course requires that students have access to Google Chrome or Microsoft Edge.

Examination System: This course uses an online exam proctoring service. The software runs as a browser extension in Google Chrome or Microsoft Edge and creates a remote proctored testing environment. It uses your computer screen, webcam, and microphone while you take exams through Canvas from your chosen location. You must also acquire an external camera as part of your examination set up.

A strong and stable internet connection is required for the system to work properly.

During the exam, you, your computer screen, and your testing environment may be recorded. An external camera is mandatory so the instructor can view your room and workspace during the exam.

Only the following individuals will have access to exam recordings:

- The instructor(s) for the course
- Teaching Assistant(s)
- The proctoring software company
- SCU proctoring administrators

The required browser extension must be installed before taking any exam. You may remove it after completing the exam.

A practice exam will be provided so you can become familiar with the system and identify any technical issues before the first graded exam. You will find this in the exam preparation assignment category on your Canvas course page.

Suggestions for completing online coursework: Save work often; this includes backing it up on multiple devices or cloud applications. When submitting final papers on the Canvas learning management system (LMS), ensure that all files have been uploaded properly. Also make sure to keep a hard copy of all papers/projects in case of an unforeseen technological failure or outage.

EVALUATION OF STUDENT LEARNING

Grading scale:

Grade	Percentage Range
A	90% - 100%
B	80% - 89.99%
C	70% - 79.99%
D	60% - 69.99%
F	<60%

Assessments:

Assessment Name	#	Weight	SLO Linkage
Participation	5	15	1-4
Exam Preparation Quiz	1	10	1-4
Homework	5	20	1-4
Reading Assignments (Optional)	14	-	1-4
Quizzes	5	15	1-4
Exams	2	40	1-4
		100%	

Course Topics:

Module	Module Title	Topic	Assessment Activity	SLO
1	Evolution and Origin of Species	Chapter 12 - Forces of Evolutionary Change Chapter 13 - Evidence of Evolution Chapter 14 - Speciation and Extinction	Homework Discussion Module Quiz	1, 3
2	Diversity of Life	Chapter 15 - Evolution and Diversity of Microbial Life Chapter 16 - Evolution and Diversity of Plants Chapter 17 - Evolution and Diversity of Animals	Homework Discussion Module Quiz	2, 3
EXAM 1				
3	Body Systems 1 Organization and Communication	Chapter 23 - Animal Tissues and Organ Systems Chapter 24 - The Nervous System and the Senses Chapter 25 - The Endocrine System	Homework Discussion Module Quiz	4
4	Body Systems 2 Movement, Circulation, Digestion and Excretion	Chapter 26 - The Skeletal and Muscular Systems Chapter 27 - The Circulatory and Respiratory Systems Chapter 28 - The Digestive and Urinary Systems	Homework Discussion Module Quiz	4
5	Body Systems 3 Defense and Reproduction	Chapter 29 - The Immune System Chapter 30 - Animal Reproduction and Development	Homework Discussion Module Quiz	4
EXAM 2				

UNIVERSITY, PROGRAM & COURSE POLICIES

University Policies

All university policies apply to this course and all others. For full policy information please consult the SCU Catalog. Additionally, program policies apply to students in each program as described in the Catalog and in SCU Health Handbook for clinical courses.

Accessibility Services and Accommodations

The Office of Student Services provides support to students with disabilities requiring accommodation in concert with the lead faculty for this course. All students are encouraged to request accommodation as far in advance of when the accommodation will be required to allow the University to process the request and provide approved accommodation. To begin the process please request a consultation with the designated Accessibility Services Officer as soon as possible. Once the Office of Student Services approves the request, the letter of

accommodation will be provided to the student and lead faculty member via email. The student should be certain to follow-up with the lead faculty member to plan for the specific accommodation needs for the course. Program requirements cannot be modified to accommodate a disability.

Please see the SCU catalog for details regarding [Accessibility Services and Accommodations](#).

A complete list of University Services is available through MySCU, including:

- [Tech Support information](#)
- [Tutoring Services](#)
- [Veterans Support Services](#)
- [Student Advocacy and Accountability resources](#)

[Learning Resource Center](#): Students can use the library's resources which provide students with an excellent collection of books, journals, electronic databases, and websites as well as consult with the librarian to help with the course.

Catalog Authority Statement

This syllabus is intended to provide an overview of course expectations, requirements, and policies. In the event of any conflict between the information contained in this syllabus and the official Southern California University of Health Sciences Catalog, the Catalog shall take precedence as the authoritative source of university policies and procedures.

Students are responsible for reviewing and complying with all policies and requirements published in the University Catalog.

Academic Integrity

Students at this university are expected to maintain the highest degrees of professionalism, a commitment to active learning, and display integrity both in and out of the classroom. Refer to SCU Academic Integrity Policies [in the SCU Catalog](#) for more complete information

Attendance

SCU policy defines attendance for all courses and specifies online courses as active, weekly participation in the course as described in the syllabus. Examples of activities could include, but are not limited to:

- Participating in weekly online chats or discussions
- Submitting or completing assignments
- Commenting on other student contributions
- Actively engaging in the course on Canvas and the external assignment platform at least three

times per week

See the Academic Policies page in the SCU Catalog for more details on the Attendance Policy.

Drop Date

It is a student's responsibility to determine unenrolling from a course. Refer to the [SCU Academic Calendar](#) for dates and deadlines for registration. Refer to SCU Drop Date Policies [in the SCU Catalog](#) for more complete information.

Incomplete Policy

Under emergency/special circumstances, students may petition for an incomplete grade. Refer to SCU Incomplete Policies [in the SCU Catalog](#) for information

PROGRAM SPECIFIC POLICIES

Course Communication Expectations

The most up-to-date information for this course will always be posted on the Canvas course page. Students are responsible for checking Canvas announcements, Canvas messages, and their SCU email regularly for updates, schedule changes, assignment reminders, or important course information. The instructor may update deadlines, instructions, or course materials as needed, and these changes will be communicated through Canvas.

Communication guidelines during course

- Write in clear, professional language. Avoid texting slang or abbreviations such as "u," "TLDR," or "TBH."
- Do not write entire sentences in ALL CAPS, as this appears as yelling.
- Treat classmates and instructors with respect at all times. Personal attacks, rude comments, or inappropriate responses are not acceptable. Any discussion posts that violate this standard will be removed and the student will receive a warning.
- If you disagree with someone's comment, respond respectfully and support your perspective with clear reasoning or examples.
- Before submitting a post or comment, review what you wrote. In online communication, it is easy for messages to be misunderstood when tone and facial expressions are absent.
- Avoid very short responses such as "I agree," "I like it," or "Funny." Instead, explain your reasoning, add another idea, or ask a question that continues the discussion.

Email etiquette

When contacting your instructor or classmates by email:

- Use a clear subject line and include your name and course number.
- Write in complete sentences and maintain a professional tone.
- Be respectful and direct when asking questions.
- Allow reasonable time for a response (typically within 24–48 hours).
- Avoid sending multiple emails about the same question before giving enough time for a reply.
- Professional and respectful communication helps create a productive learning environment for everyone.

Professional behavior in an online course is expected to meet the same standards as behavior in an in-person classroom.

Use of Artificial Intelligence (AI) in Coursework

The use of artificial intelligence (AI) tools in Accelerated Sciences courses is governed by specific guidelines to ensure that student learning objectives are met and that academic integrity is maintained. While AI tools may be useful for learning support, their use must not replace independent student work or compromise the learning process.

Unless otherwise explicitly authorized by the instructor, AI use is permitted or prohibited as follows:

Permitted Use (with Disclosure and Citation):

AI tools may be used to assist with discussion posts or participation activities, including case-based discussions, only when all of the following conditions are met:

- The use of AI tools is clearly disclosed to the instructor
- Any AI-generated content is appropriately cited
- The student reviews, understands, and takes responsibility for the submitted work

Failure to properly disclose and cite AI-assisted work may result in a grade of zero for the assignment.

Prohibited Use:

The use of AI tools is strictly prohibited in the following types of coursework:

- Homework assignments
- Laboratory notebooks
- Laboratory reports
- Quizzes
- Examinations
- Any graded assessment where independent student work is required

Use of AI tools in any prohibited assignment or assessment will be treated as an academic integrity violation.

Academic Integrity and Consequences:

Any use of AI that is inconsistent with this policy constitutes a violation of the University Academic Integrity Code and will be subject to review by the instructor and the Academic Programs leadership within the Accelerated Sciences Division.

If a violation is confirmed, the student may receive:

- A grade of zero on the assignment or assessment
- No opportunity to resubmit the work

- Additional disciplinary action as outlined in the University Catalog, if applicable

Student Responsibility:

Students are responsible for understanding when AI use is permitted and for consulting with the instructor if there is uncertainty regarding acceptable use. Questions regarding this policy may also be directed to the Office of the Director of Accelerated Sciences.

Teaching Methods & Activities

Instructional methods may vary depending on the course delivery model and learning objectives. Courses may include synchronous (live) instruction, asynchronous learning activities, or a combination of both.

Synchronous Instruction:

In courses with scheduled class meeting times, instruction may be delivered in real time by the instructor. Students are expected to attend scheduled sessions and adhere to course attendance expectations.

Asynchronous Instruction:

In asynchronous courses, students engage with course materials independently yet are expected to meet established deadlines. Instructional materials may include recorded lectures, readings, demonstrations, or other learning resources. Students should anticipate dedicating sufficient time to review course materials and complete required learning activities.

Course Learning Activities

Course learning activities are designed to support student understanding and mastery of course content. Depending on the course, activities may include one or more of the following:

Class Sessions and Content Review:

Instructional time and learning activities focus on topics identified in the course schedule. Students are responsible for reviewing assigned materials prior to scheduled sessions or deadlines. Active participation through questions, discussion, and engagement with course materials is encouraged.

Discussions:

Courses may include structured discussion activities designed to promote engagement with course concepts and collaboration among students. Discussion activities may occur in live sessions or through online discussion boards. Students are expected to participate thoughtfully and respond to instructor prompts and peer contributions as required.

Assignments and Practice Activities:

Courses may include homework assignments, applied exercises, problem-solving tasks, or other practice activities designed to reinforce learning objectives and promote critical thinking.

Quizzes and Knowledge Checks:

Courses may include quizzes or other formative assessments intended to evaluate comprehension of assigned readings and instructional materials.

Applied Activities or Case-Based Learning:

Some courses may include applied learning experiences such as case studies, scenario-based exercises, or real-world problem-solving activities designed to integrate and apply course concepts.

Examination Preparation: An Exam Preparation Quiz is included as a required course component and must be completed prior to taking the first exam. This quiz verifies that students can successfully use the exam proctoring system and demonstrate required testing conditions. If the quiz is not completed correctly on the first attempt, instructors will provide feedback and allow one additional attempt to correct any issues. Students will not be permanently blocked from examinations solely due to incomplete preparation activities; however, failure to complete the Exam Preparation Quiz will result in loss of the associated points assigned to this category.

Examinations:

Courses include a minimum of two examinations designed to evaluate student understanding of course material. Exams may cover content from assigned readings, instructional materials, and learning activities. Examinations collectively account for 40% of the final course grade, regardless of the total number of exams administered. Study materials or preparation guidance may be provided at the instructor's discretion.

Calculation Sheets: If applicable, calculation sheets/work must also be uploaded to exams in order to receive full credit. These are required to be uploaded within 15 minutes of exam completion; however, if there is an issue with the upload, you must contact the Respondus helpdesk immediately and provide your instructor with the ticket number within 24 hours of exam completion.

Technology Failure: If you experience a technological outage or failure during your exam, you must reach out to the Respondus helpdesk and/or your instructor immediately. Failure to document said failure within 24 hours of the exam attempt could result in a zero for that exam with no opportunity for a retake.

Final Examination Policy: Due to institutional grading timelines, retakes are not permitted for final examinations. If a protocol violation occurs during a final examination, a documented penalty up to 10% may be applied at the instructor's discretion based on the severity of the violation. If an academic integrity violation occurs during a final examination, a grade of zero will be assigned for the exam, and the case will be handled in accordance with the University Academic Integrity Code.

All examination irregularities, technical failures, and protocol violations are subject to review by the instructor, Academic Affairs, and the Department Director to ensure consistent application of examination policies.

Assignments

All assignments in our courses have weekly deadlines. The most up-to-date deadlines and instructions will always be posted on the Canvas course page.

You must regularly check Canvas announcements, Canvas messages, and your SCU email for updates or changes. The instructor may update deadlines or assignment instructions as needed.

Failure to complete assignments by the deadline will result in a penalty. Penalties vary depending on the assignment.

Accelerated Sciences Course Recommendations

Students are expected and encouraged to:

- Complete readings before module starts. Skim the chapter before it is covered to become comfortable with some of the terms associated with each topic. Review each chapter after the end of the module to enhance understanding of the material.
- Not wait until the night before homework is due to start the assignment. Understanding concepts will be enhanced if the time is taken to learn them beforehand and later review the material without being rushed.
- Submit all written assignments by the due dates for feedback which will help you to improve your work throughout the course.
- Stay focused by finding an environment to study with few distractions.
- Take consistent notes on all assignments and review them regularly to gain mastery.
- Remember that procrastination in an accelerated course can quickly prove disastrous! Failure to learn foundational principles can make all future material seem nearly incomprehensible, so make sure to budget time wisely over the next five weeks to ensure your success.
